

Gravitazz Institute

For disaster reduction and emergency management

Training Outline:

Strategic Disaster Risk Planning and Management

The increasing impacts of disasters highlight the need to address them in accordance with a more strategic and focused approach. The opportunity and challenge now resides in bringing together the wealth of practical disaster response experience and knowledge in disasters in a holistic and integrated manner. Strategic disaster risk planning and management makes it possible to manage the entire life cycle of a potential crisis. Strategic planning establishes priorities, identifies expected levels of performance and capability requirements, provides standards for assessing capabilities, and helps stakeholders learn and understand their roles better.

Target Audience: This training is meant for practitioners, decision and policy makers working in the development/environment/climate change adaptation sectors and specifically those in disaster risk management, volunteers and staff working with organizations tasked with disaster risk prevention. This includes individuals working with government institutions, NGOs the UN, intergovernmental bodies and the private sector. Students and young professionals who would like to increase their knowledge in the field are also welcome.

Duration: 3 days

Language: English

PLEASE NOTE:

This course can be customized for your institution upon request.

About this Course

The purpose of the course is to provide comprehensive disaster risk management process knowledge and skills to enhance the capabilities of oversight, facilitation and coordination for managers who have key disaster risk management responsibilities. It is designed to enable professionals working in disaster risk management, development and in donor agencies to effectively integrate disaster risk management into their development programs and policies. Participants will be encouraged to develop key strategies and adopt proactive attitudes through participation in interactive lectures and reflection on a range of key issues raised during discussions and practical activities. This course will focus on empowering participants with both disaster risk management skills and management skills in general. Participants will get an insight into assessing risks, preventing risks and managing disasters. The courses will focus on the nuances of the 4 phases of disaster risk management (disaster prevention, preparedness, response and recovery), risk assessment, research methods, business continuity management, management of disasters and disaster theories.

Expected Outcomes

Participants will be taught to understand disasters and its management from a scientific point of view and the use of technology in the predictions and reactions associated with disasters. Strategic Disaster Risk Planning and Management strives to assist in the design of a strategy by interpreting the disaster risk management needs, placing them in line with the strengths, core purpose and competence of an organization and its workforce.
